Environmental Scope

The management of environmental aspects, within our operational boundary, related to the manufacturing and distribution of metal stampings, deep draw brackets and fabricated metal stampings. Our operational boundary includes our physical property, as defined by the integrated contingency plan and environmental impacts we can influence outside of our physical property for the life cycle of the part.

Environmental Policy

- *Precision Stamping believes in achieving and demonstrating sound environmental performance by controlling the impacts of manufacturing metal stampings, deep draw brackets and fabricated metal stampings on the environment.*
- *We are fully committed to supporting environmental protection and the prevention of pollution. We are also committed to continuous improvement of the environmental management system to enhance environmental performance.*
- *It is our goal to fulfill our compliance obligations, our customer requirements and the ISO14001 standard.*
- *Precision Stamping is aware of the environmental issues concerning the products used and produced by our company. We manage these significant aspects by setting and reviewing environmental objectives and targets.*
- *We communicate this policy to all employees and contractors working on behalf of Precision Stamping.*

John Parke III
President - January 1st 2017

Our organization acknowledges completing the Supplier Questionnaire within the Supplier Manual Precision Stamping has provided to us. We acknowledge that Precision Stamping, as an ISO14001 accredited organization, considers the environment to be a key stakeholder of the organization and our business dealings will be conducted within the spirit and intent of Precision Stamping's Environmental Scope & Policy. As applicable to suppliers subject SDS/MSDS Regulations: we acknowledge understanding the requirements of section 8.0 of Precision Stamping's Supplier Manual.
